Education

FPT University — Hanoi, Vietnam
Bachelor of Artificial Intelligence — *Oct 2023 – Jan 2027*

Hanoi University — Hanoi, Vietnam
Bachelor of Arts in English Language — *Oct 2024 – Dec 2028*

Experience

AI Engineer (Remote - Part-time) — Jul 2025 – Dec 2025
10 Group Vietnam Technology and Education Co., Ltd. — *Hanoi, Vietnam*

- Developed internal and sales chatbots, including AI agents for selling MOS courses using n8n
- Transitioned from no-code workflows to pure-code AI development with Python and LangGraph
- Managed and integrated databases such as PostgreSQL, Cassandra, and ScyllaDB with external APIs
- Built the core backend system for data upload, processing, database querying, and RAG-based chatbot responses

Data Scientist / AI Automation Intern — Aug 2025 – Dec 2025
Insight Data — *Hanoi, Vietnam*

- Built ML/DL models for prediction tasks across different projects, such as forecasting house prices per m^2 from historical data
- Developed internal company chatbots tailored to specific business purposes
- Created a Rule Chatbot to answer questions about company policies and internal regulations
- Built a CV Chatbot to receive, manage, and store candidate CVs by job position

Computer Vision Data Annotator (Remote - Freelance) — Sep 2025 – Oct 2025
Alchera Vietnam — *Ho Chi Minh City, Vietnam*

- Annotated parking spaces in Korean image datasets for computer vision projects
- Created accurate bounding boxes aligned with LiDAR data for each parking slot
- Added detailed attributes such as occupancy status, line type, and parking type
- Followed project labeling guidelines to ensure high accuracy, consistency, and data quality

Projects

Verba | *Tech Lead / AI Engineer* | *Python, FastAPI, PostgreSQL, PhoWhisper* — Jan 2026 – Apr 2026

- Description:
  - Users register, upload meeting audio (.mp3, .wav), track processing and view transcripts, and use a synchronized audio player to edit and export results as a .docx file
  - Speech is transcribed via PhoWhisper/faster-whisper and summarized by the Gemini API into summary, decisions, tasks and deadlines, reducing manual note-taking and highlighting key content and deadlines
- Responsibilities:
  - Integrated PhoWhisper/faster-whisper for speech-to-text and stored transcripts in PostgreSQL
  - Built AI summarization via Gemini API and a synchronized audio player with editing and export features

Invera | *Tech Lead / AI Engineer* | *Python, FastAPI, DeepSeek LLM* — Jan 2026 – Present

- Description:
  - Developed a full-stack AI-powered mock interview platform specializing in realistic video interview simulations to help candidates enhance their skills
  - Integrated Large Language Models (LLMs) and real-time speech recognition to automatically evaluate candidate responses, provide structured feedback, and track performance telemetry
- Responsibilities:
  - Architected and deployed scalable AI microservices within a FastAPI backend, serving Large Language Models (DeepSeek) and Speech-to-Text (Vosk) models for real-time video interview processing
  - Engineered advanced prompt pipelines and scoring algorithms to automatically analyze candidate transcripts, providing highly accurate, context-aware evaluations and contextual feedback
  - Built robust data ingestion and telemetry pipelines using MediaPipe and NLP techniques to clean up STT artifacts, structure raw audio/video data, and optimize overall model inference latency

Technical Skills

Languages: Python, C++, SQL (PostgreSQL)
AI & Machine Learning & Deep Learning: PyTorch, TensorFlow, Keras, RAG, AI Agent Design, Vector Search, LangGraph
Data Science & CV: Pandas, NumPy, Matplotlib, MediaPipe
Backend & Frameworks: FastAPI
Databases & Automation: PostgreSQL, ScyllaDB, n8n
Developer Tools: Git, Docker, VS Code
